VPN 04 REQUIREMENTS RELATED TO A FARM LAYOUT PLAN

(Quoted from the new proposed VPN 04)

- 1.1 Provide a layout sketch plan of the compartment that complies with the following:
- Indicate the entire perimeter of the compartment (limited to a contiguous piece of property);
 - All entryways/gates to the compartment must be indicated;
 - All camps and their gates must be indicated;
 - All roads or vehicle tracks on the farm have to be indicated;
 - All permanent ostrich watering and feeding points must be indicated;
 - All water troughs on the compartments must be numbered on the layout plan. These numbers must be used when Form: BSM11/002 for verification of prescribed water treatments is being completed every week/month;
 - All permanent structures on the compartment e.g. Dwellings, camps, dams, sheds, etc;
 - Indicate all permanent handling facilities eg. Raceways, loading ramps, etc.;
 - For compartments where ostriches other than day old chicks are received or dispatched, indicate dedicated pre- and post-movement holding pens with their capacities (BSM05) and
 - For compartments that deliver ostriches directly to abattoirs for slaughter and export of meat to the EU, indicate the pre-slaughter isolation camp(s) with its capacities and its related facilities for receiving and despatch of ostriches.
